Peer review policy	<p>The peer review policy of Journal of Business Management was introduced in 2012.</p> <p>Peer review policy of the journal: Each paper is reviewed by the editor and, if it is judged suitable for this publication, it is then sent to two referees for double blind peer review. Based on their recommendations, the editor then decides whether the paper should be accepted as is, revised or rejected.</p> <p>In submitting research papers, the authors are asked to prepare their manuscripts in such a way that they do not reveal their identities to reviewers, either directly or indirectly. For better quality of research papers, in 2016 we introduced a standardised template for reviewers. This template requires the author to provide feedback and comment on amendments to the paper made after the review.</p> <p>The reviewing process and quality criteria of the Journal of Business Management are described in Authors Guidelines that is available on journal homepage.</p>
